

# Be Water For Life

SAVE A LIFE. Give Clean Water.

According to Unicef, a child dies every **20 seconds** from a water-borne disease

Each year, **1.8 million** children die from water-borne diseases

**1/2 of the world's** population live in poverty

## What's in the water?

E.coli

Schistosoma

Malaria

Cholera vibrios

Dysentery

Diarrhea Bacteria

Salmonella typhi (Typhoid Fever)

Giardia

Hepatitis A

LEFT UNTREATED, THESE DISEASES RESULT IN DEATH

### FILTERS SPECS:

Filter cost = \$30

Filters to 1 micron

10 years of life

150 gallons of water per day

Filters ALL harmful water-borne diseases

1 million gallons over its life time

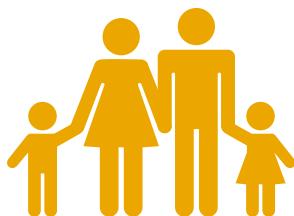

Gravity fed, no moving parts

Easy to use

### SOLUTIONS TO THE PROBLEMS:

Removes harmful bacteria and protozoa from water

Healthy families can eat and be educated

Less travel for water, more time at home
